5/8" & 3/4" diameter please call for available sizes

* Anchor lengths are measured from underneath the head.

* To determine the minimum length of anchor required, add the thickness of the material to be fastened to the minimum embedment for the diameter of anchor being installed.

Installation

1. Drill a hole into the base material at least 3/8" deeper than the anchor length. Make the hole the same size as the anchor diameter (3/8" hole for 3/8" anchor).
2. Blow the hole clean using compressed air.
Alternatively, drill the hole deep enough to accommodate embedment length and drilling dust.
3. Install the Ultra 6 Lobe security anchor through the fixture directly into the base material.
4. Tighten to required installation torque (see below).

IMPORTANT: Make sure the hole in the item being attached is slightly larger than the anchor diameter.

5/8" dia & 3/4" dia

AVSAFE

Oval-Pan Security Screws & Tools

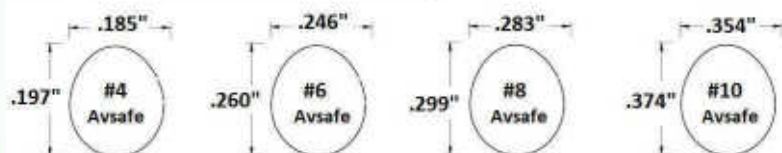

TAMPER-RESISTANT SECURITY FASTENERS THAT HIDE IN PLAIN SIGHT

High Security

- Oval-pan heads with beveled sides prevent removal with conventional tools. Install in a recess for utmost security.
- Can only be removed by tools exclusively manufactured in the USA by Ultra Fasteners – not available in hardware stores.
- Does not invite tampering as it appears to be an ornament rather than a fastener head.

Avsafe tools match the thread size: eg. #8 Avsafe screw & 8-32 Avsafe Screw use #8 Avsafe Tool. Avsafe tool size can also be determined by measuring the head.

Functional and Hygienic

- No flutes, recesses, holes or sharp edges.
- Ideal for medical and food-handling equipment – design prevents trapping of bacteria or food.
- Ideal for electronics – design prevents electron discharge.
- No sharp edges to snag clothing or cause injury.

Easy to Install

- Male-headed screws can be held in place by the screwdriver before entering the workpiece, simplifying their use even when access is limited.

AVSAFE screwdriver
approx. 8" overall length

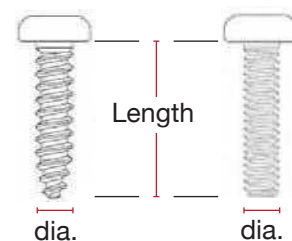

AVSAFE driver bit
(standard 1/4" hex)
approx. 2-3/4" overall length
